ABOUT ME

Full Stack Web Developer with approximately 2.5 years of professional experience in developing and maintaining enterprise web applications, with a strong focus on frontend development using JavaScript, Vue 3, and the Quasar Framework. Experienced in building modular, reusable user interfaces, integrating RESTful APIs, and working with C# and the .NET Framework using layered architectures. Committed to Clean Code, SOLID principles, maintainability, and continuous learning, with experience working in Agile environments (Scrum) and collaborative teams.

WORK EXPERIENCE

ONEZIP S.A.S
Florencia
Jan 2024 - Jul 2026

Full Stack Web Developer

Developed and maintained enterprise web applications, contributing to both frontend and backend development to deliver complete and cohesive solutions. Implemented user interfaces using Vue 3, Composition API, Vue Router, JavaScript, HTML5, CSS, and Quasar Framework, creating dynamic, modular, and reusable components focused on delivering a good user experience. Developed backend solutions using C# and .NET Framework, applying layered architecture, separation of concerns, and software development best practices to improve maintainability and scalability. Integrated and consumed REST APIs to enable communication between frontend applications and backend services, ensuring efficient and structured data exchange. Managed and queried relational databases using SQL Server, as well as developed features involving XML processing, PDF generation, Excel data handling, and the creation of business reports. Collaborated with development teams using Git and Azure DevOps, working under Agile/Scrum methodologies and applying SOLID principles and Clean Code practices to improve code quality and the overall development process.

EDUCATION

SENA (CENTRO TECNOLÓGICO DE LA AMAZONIA)
Florencia
2024

Technologist in Software Analysis and Development

Comprehensive training in the analysis, design, and development of software applications, covering programming, databases, web development, APIs, application architecture, and agile methodologies. Practical training focused on building scalable, maintainable solutions centered on user needs.

CUN (CORPORACIÓN UNIFICADA NACIONAL DE EDUCACIÓN SUPERIOR)
Florencia
